QUALIFICATION PROFILE

Senior Application Support & System Analyst with more than 6 years of experience supporting the implementation, development, and operation of enterprise applications across the Government, Automotive, and Retail sectors. Experienced in end-to-end Application Support (L2/L3), Business & System Analysis, Manual Software Testing (UAT, Functional, Regression), Database Administration, Linux Server Support, and Production Support. Skilled in translating government regulations into system requirements, collaborating with developers in application development, implementing systems in government institutions, providing user training, and ensuring optimal application performance through monitoring, troubleshooting, and continuous improvement.

WORK EXPERIENCE

PT Mutiara Bintang Abadi – Bandung (PT Valuestream International Group)

Application Support Engineer (November 2020 – 2026)

- Handled end-to-end Application Support (L2/L3), including incident handling, application troubleshooting, and root cause analysis.
- Served as the first point of contact for users through WhatsApp and ticketing systems, performing initial analysis, incident classification, and escalation.
- Coordinated with the development team to resolve bugs, implement enhancements, and support application deployments.
- Performed incident handling, problem management, and root cause analysis for application-related issues.
- Provided technical support to users and ensured issues were resolved in accordance with established Service Level Agreements (SLAs).
- Analyzed business requirements based on Regional Regulations (Perda), Regent Regulations (Perbup), Mayor Regulations (Perwali), Government Regulations (PP), and other related regulations, translating them into system requirements.
- Conducted requirements gathering, business process analysis, and prepared application enhancement proposals.
- Provided recommendations for changes to system workflows, user interfaces, and data structures in accordance with user requirements.
- Translated business requirements into system specifications, process flows, and feature development proposals.
- Prepared test scenarios and test cases based on agreed requirements.
- Conducted Functional Testing, User Acceptance Testing (UAT), Regression Testing, and verification of bug fixes and enhancements.
- Performed testing in both staging and production environments prior to system usage by end users.
- Documented testing results and ensured that all changes met user requirements.
- Wrote and executed MySQL queries for data validation, operational requirements, and issue investigation.
- Performed database backup, restore, and synchronization activities to support implementation needs.
- Conducted Linux Server (CentOS) troubleshooting, server resource monitoring, application log analysis, and system performance analysis.
- Performed minor fixes to application configurations and code to support operational activities.
- Created and managed cron jobs to support system automation processes.
- Performed IAM (User, Role, and Permission) checks in accordance with application operational requirements.
- Implemented applications in government institutions in accordance with project scope.
- Performed initial system configuration prior to user go-live.
- Delivered training sessions for operators and administrators on application usage.
- Assisted in preparing system user guides and operational documentation.
- Supported users in understanding new features and application business processes.
- Acted as a Product Leader by coordinating team task distribution, conducting quality control on analysis deliverables, monitoring ticket resolution, and ensuring proper escalation to developers.
- Assisted in monitoring ticket resolution based on priority and urgency levels.
- Served as a liaison between users, implementation teams, and development teams.

AUTO 2000 Bandung Asia Afrika – Bandung (PT Astra International Group)

Maintenance Service Appointment (April 2019 – Oktober 2020)

- Managed and analyzed service operation data from multiple sources to support MRA team operations.
- Prepared operational reports for workshop managers, including trend and service pattern analysis.
- Utilized Microsoft Power BI for data visualization and operational insight reporting.
- Supported customer reception processes and coordinated service requests with related departments.
- Performed data updates and validation within the service operations database.

Mitra Bahan Sepatu – Bandung

Staff Warehouse (Mei 2018 – April 2019)

- Managed inventory and stock using the FIFO (First In, First Out) method to ensure accuracy and availability.
- Conducted regular stock opname and inventory recording.
- Handled warehouse administration, including item inspection, packing, and distribution according to orders.

EDUCATION

Sekolah Tinggi Teknologi Bandung (2019 - 2023)

Bachelor of Informatics Engineering – GPA 3.45 / 4.00

Final Project: Customer Service Priority Classification using Fuzzy C-Means (Web-Based System)

SMK Assalaam Bandung (2015 - 2018)

Software Engineering

CERTIFICATE

TOEFL (2023) | 505/PETAL/St-TOEFL/2023

Yayasan Bianglala Prima Edukasi

Project Management Associate (2023)

Logical Operations | 2023-C-018543

Foresec Certified in Networking Security (2022)

FORESEC | 0822-008950

Passed Competency test of Vocation Skills Laravel and Android (2018)

Be : Logix | 024/BELOGIX/IV/2018

Mobile Programming and Web Application Training Intermediate Level (2017)

Be : Logix | 036/Ass-PKL/VIII/2017

CORE COMPETENCIES

- **TECHNICAL & APPLICATION SUPPORT**
 - Application Support (L2/L3)
 - Incident & Problem Management
 - Root Cause Analysis
 - User Training & Technical Support
 - System & Application Documentation
 - Production Support
 - Technical Support
 - User Training
- **SYSTEM ANALYSIS**
 - Requirement Gathering
 - Business Process Analysis
 - System Analysis
 - Functional Analysis

Flow Process Analysis
Feature Enhancement Analysis
Government Regulation Analysis

- **SOFTWARE TESTING**

SDLC Understanding
Test Planning & Test Scenario
Manual Testing (Black Box & Functional)
User Acceptance Testing (UAT)
Regression Testing
Software Testing Lifecycle
Bug Tracking & Reporting
Test Scenario Design
Test Case Creation
Bug Verification

- **DATABASE**

MySQL Query & Data Analysis
Database Administration (Support Level)
Backup & Restore Database
Synchronize Database
Data Validation

- **LINUX & INFRASTRUCTURE**

CentOS Server
Cronjob Management
Service Monitoring
Log Analysis
Basic Network Troubleshooting
IAM (User, Role & Permission)

- **API & TOOLS**

API Testing (Postman)
JSON Validation
REST API

- **BASIC DEVELOPMENT KNOWLEDGE**

PHP (Laravel & Native)
HTML, CSS, JavaScript
Understanding of MVC Architecture

- **REPORTING & ANALYTICS**

Data Processing & Analysis
Operational Reporting
Visualization & Insight Generation
Microsoft Power BI

- **SOFT SKILLS**

Problem Solving & Critical Thinking
Communication & Collaboration
Multitasking & Time Management
Cross-Team Coordination
Local Tax Expertise

WORK TOOLS

- Postman (API Testing)
- Redmine (Ticketing & Issue Tracking)
- Navicat Premium
- WinSCP

- SecureCRT
- Visual Studio Code
- Microsoft Power BI
- Microsoft Office (Excel, Word, PowerPoint)
- Git (Basic)
- Google Workspace
- MySQL
- Linux Terminal
- Web P.O.S
- Mobile P.O.S
- Reconsiliasi
- Esign
